DETAILED ACTION

Response to Arguments

1. The amendments and arguments presented by the applicant have been duly noted. In view of such, the previous election/restrictions in the first office action have been withdrawn. However, a revised election/restrictions is presented below.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-18, drawn to apparatus of multi-air conditioner, classified in class 62, subclass 324.6.
 - II. Claim 19, drawn to method of operation, classified in class 62, subclass 160.
 - III. Claim 20, drawn to method of operation, classified in class 62, subclass 180.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions Groups II-III and Group I are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another materially different processes such as the control air-conditioner with constant fan speed. Or, another materially different apparatus such as a multi-air conditioner without a heating electronic expansion valve can practice the fan control process as claimed.

4. Inventions Group II and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

Art Unit: 3744

shown to be separately usable. In the instant case, invention Group II has separate utility, which can be used to operate air conditioner without fan control process. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Groups II-III is not required for Group I, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chen-Wen Jiang whose telephone number is (703) 308-0275. The examiner can normally be reached on Tuesday-Friday from 7:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Denise Esquivel can be reached on (703) 308-2597. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
